## What is an MPO?

- ◆ A Metropolitan Planning Organization or MPO is a transportation policy-making and planning body with representatives of local, state & federal government and transit providers.
- ◆ An MPO is required in urbanized areas of 50,000+ population.
- ◆ An MPO ensures federal spending on transportation occurs through a comprehensive, cooperative and continuing (3-C) process.

## Who is the FMPO?

- ◆ The Flagstaff Metropolitan Planning Organization (FMPO) is the leader for coordinating regional transportation and land use planning with innovative communication and solutions.
- ◆ We plan, coordinate, and integrate activities necessary to maintain a comprehensive, cooperative, and continuing multi-agency transportation planning program.
- ◆ Jurisdictions that make up the FMPO are the City of Flagstaff, Coconino County, and the Arizona Department of Transportation (ADOT) operating as "Partners in Transportation Enhancing Our Community."

## Executive Board and Technical Advisory Committee

The **Executive Board** acts as a policy body coordinating and directing transportation planning, implementation and related activities within the overall regional comprehensive planning process. There are six elected or appointed officials with three from the Flagstaff City Council, two from the Coconino County Board of Supervisors and one from the ADOT State Transportation Board. The **Technical Advisory Committee (TAC)** are managerial staff representatives from each of the participating agencies and NAIPTA there may be one or more ex-officio non-voting representative each from the FHWA, FTA, and Northern Arizona University (NAU). The TAC provides recommendation to FMPO staff and to the Board.

East Flagstaff Traffic Interchange

Both the Board and TAC work on transportation planning utilizing tax based initiatives and federal funding to resolve issues such as traffic congestion.

The **East Flagstaff Traffic Interchange** and the **Fourth Street Bridge** are excellent examples of effective transportation planning to reduce traffic congestion and improve conditions for cars, pedestrians, buses and bikes.
